

Tetrahydrocannabivarin isolate

THCV · CAS 31262-37-0 · C₁₉H₂₆O₂ · 286.41 g/mol

SPECIFICATION	at least 99.9% THCV by HPLC
FORM	Isolate
FAMILY	Varin series
IDENTITY	HPLC against a qualified reference standard; NMR or LC-MS when a primary standard is on allocation, disclosed on the COA
ASSAY BASIS	% w/w of the named cannabinoid
RESIDUAL PANELS	Residual solvent (ICH Q3C classes as applicable), heavy metals, pesticides — with the lot pack on request
STORAGE	Ambient, dry, dark unless the COA says otherwise
ORIGIN	Lot-level, disclosed on the COA (labs in Canada and the United States)
DOCUMENTS	COA per lot; SDS on request
INTENDED USE	Ingredient / research use only. Not for human consumption as sold. No structure/function or disease claims.

Mass tiers

Available: identity and assay cleared. Contact for pricing: quoted by a person within one business day. Coming Soon: no lot yet; inquiries welcome.

5 g	Contact for pricing
100 g	Coming Soon
1 kg	Coming Soon
5 kg	Coming Soon
10 kg	Coming Soon
50 kg	Coming Soon
100 kg	Coming Soon

Notes

THCV isolate for qualified B2B buyers. Availability is campaign-based; most volume tiers open as Coming Soon until the current lot is released. THCV is a propyl analog. Buyers must confirm destination-state legality and any THC isomer limits before shipment. Peregrine does not ship to restricted jurisdictions.

This sheet states the specification for the SKU. Measured values — identity method used, assay, other cannabinoids, residuals, appearance, water activity and origin — are reported per lot on the certificate of analysis that ships with the material. Destination jurisdiction is required on every inquiry; some materials (THCV and isomer-adjacent species) require review before shipment.
